

Our specialist approach

International Talents provides companies in Belgium with **full recruitment services**. We handle multilingual native professionals at all levels. We have broad experience in recruiting staff for international companies with offices in Belgium and we help numerous companies define their recruitment needs at any level.

Our native professionals are living in Belgium with a valid work permit and have a wide variety of competencies. We are always able to provide someone who fits your vacancy perfectly.

We offer several areas of expertise such as:

- **secretarial and administrative support,**
- **call centre employees,**
- **internal sales,**
- **logistic support,**
- **legal assistants,**
- **project coordinators,**
- **...**

Our services consist of three distinct formulas:

1. Temping

The flexibility of this formula appeals to many candidates: they consciously opt for a number of consecutive assignments in order to gain experience and explore the job market.

For temporary assignments that hold the possibility of a permanent contract, the temping formula is the perfect way to get to know the candidate better as it allows you to evaluate him / her on the job.

2. Recruitment & Selection

International Talents is a recognised recruitment agency, meaning you can choose to hire a candidate directly providing the payment of a recruitment fee.

3. Outsourcing Solutions

International Talents offers outsourcing solutions to address your needs. These services are performed by (one or more of) our competent employees, allowing you to focus your time and energy on your core business. Continuity and quality guaranteed.

International Talents aims to become a market and community leader as the most qualitative **full service agency** for selecting, recruiting, assigning, outsourcing, training and coaching of native professionals.
